Amiga Cheetah 4770 UW SCSI Host Controller

Advanced UW SCSI Controller Board

This Zorro III board is based on the A4091 which was designed and sold by Commodore and DKB Software.

Features:

- SPI Boot ROM
- LSI 53C770 SCSI II controller
- 68 pin internal connector
- 68 pin external SCSI2 connector
- Active SCSI termination
- Zorro III bus support

Based on the A4091 SCSI2 controller. The Commodore A4091 was reverse-engineered by Stefan Reinauer and Chris Hooper.
